I noticed the latest email with a Terry File 8_12_2010 has the data requested on 8/12/2010. Do you still need information from me?

Eric

"Table 5 has an entry of 9 in some of the cells under RA. It probably should be 0 or 1. I highlighted the cells needing correction. I need additional fields in the spreadsheet. I entered the needed fields in Table 5 and highlighted them. The fields needed are previous exposure to asbestos, bmi, smoking, age at x-ray, and sex. I think the previous exposure to asbestos field should be in the tab with the health effects and cumulative exposure. It will probably be better to add another tab with the id and confounding variables. I am concerned about having too many columns in the Table as it makes it difficult to read and print. Consider moving the RA column to the tab with the confounders if there is a size problem."
